Bourque Logistics Updates Software and Announces New User Interface

New user interface enhancements streamline Bourque Logistics' software and applications.

The Woodlands, Texas – June 20, 2016. Bourque Logistics, the leader in industrial logistics systems for more than 27 years, hosted a biennial User Group Conference focused on system enhancements and additions to its logistics modules. Our customers provide valuable feedback on past and future enhancements to our software developers, and our systems evolve to meet the ever-changing requirements of our shipper customers.

At our most recent user conference, we presented a beta version of our new user interface created to optimize management and reporting of logistics transaction. As a result, users will benefit from an experience that is:

- **Clean:** A simpler, approachable visual interface for users to discover priority information and actions at a glance.

- **User-Driven**: Familiar icons and images make it easy to navigate the new platform.

- **Contextual:** Predictive features personalize the relevancy of information based on a user's unique needs and previous sessions in the platform.

The updated interface is set to launch with a small number of software applications in Fall 2016. The full rollout will take place over the months following the initial launch.

For a complete list of our software applications and services, please visit our website at bourquelogistics.com.

About Bourque Logistics
Headquartered in The Woodlands, Texas, Bourque Logistics is the leading rail fleet and shipment management software for rail shippers and has automated rail shipment processes for shippers since 1989 with RAILTRAC®.

Bourque Logistics now provides a full suite of modules addressing multi-mode shipment operations for loading and shipping, bill of lading submission, tracking and tracing, freight rating and payment, fleet accounting, supply chain management, and custom reporting. Our EDI data services connect shippers with their suppliers, customers, and carriers. Bourque Logistics also provides professional service support for rail fleet expediting and railcar maintenance management.
