**Bourque Logistics Introduces the all new RAILChannel**

*RAILChannel provides videos that offer tips and techniques on how to get the best benefit from our software.*

**The Woodlands, TX – May 1, 2013** - Bourque Logistics (BL), the leader in logistics software for industrial shippers, introduces the launch of Bourque's all new [www.railchannel.com](http://www.railchannel.com) site.

**\*\*Our NEW feature benefits include functionality with search capability, close captioning, and even search for text within an actual video.**

RAILChannel.com provides videos that offer tips and techniques on how to get the best benefit from our software modules. For training, you can access 2-3 minute videos that address common software functions, such as data entry and reporting. These are available via the web and in some cases embedded directly within our software. In addition, we offer our clients custom video documentation of your logistics process.

RAILChannel.com was created to easily view video tutorials on all of the Bourque Logistics modules including RAILTRAC®, YardMaster®, eBILL®, RAILAcct®, RateServer®, TransPay® and others.

To use the new search feature, simply log into RAILChannel.com using your Bourque Logistics customer citrix login user name and password. Once logged in, simply type your criteria in the empty search field. Click once on the video to begin watching.

You can click the "CC" to turn closed captioning off or back on. Once in the video, use the search field at the top left corner to search for text within the video.

We appreciate you taking the time to log in and navigate the new site. We look forward to your feedback. Visit [www.railchannel.com](http://www.railchannel.com) to watch our software overview videos now.

**About Bourque Logistics**

Headquartered in The Woodlands, Texas, Bourque Logistics has automated rail shipment processes for shippers since 1989 with RAILTRAC®, the leading rail fleet and shipment management software for rail shippers.

BL now provides a full suite of modules to address multi-mode shipment operations for loading and shipping, bill of lading submission, tracking and tracing, freight rating and payment, fleet accounting, supply chain management and custom reporting. Our EDI data services connect shippers with their suppliers, customers, and carriers. BL also provides professional service support for rail fleet expediting and railcar maintenance management.
