## **Bourque Logistics Introduces RAILPort® Mobile**

*RAILPort® Mobile App has been launched to address the logistics needs of Industrial Shippers.*

**The Woodlands, TX – May 18, 2014** - Bourque Logistics (BL), the leader in logistics software for industrial shippers, introduces RAILPort® Mobile App.

RAILPort® is Bourque's web-based report tool that allows you to quickly customize and distribute reports of your own design and requirements. In addition, the RAILPort® report writer offers Bourque Logistics' base reports also known as "templates". These time-saving template reports are provided for your convenience and allow you to build your own customized reports using them as a base.

Now RAILPort® Mobile brings that same reporting capability to your smartphone. This web app provides access to any report you designed on the desktop and is available to all Bourque RAILPort® customers. "Our new RAILPort Mobile system is a huge asset to our clients who need 24x7 availability to their fleet information", said Steve Bourque, president of Bourque Logistics. "This tool will allow them untethered access to any rail logistics data and reporting, customized to their needs."

New feature benefits of RAILPort® Mobile include:

- To run your report, simply select the applications and queries you'd like to view, then choose your report.
- You'll have the opportunity to adjust your filters before the report runs. This way, you can pre-filter the data for faster access to specific information.
- Once the report runs, you'll only see a few columns on the screen. By touching the appropriate line, you can get detailed information about that item. And, if you need different columns in the main view, you'll be able to choose which columns you'd like to see.
- Throughout the application, you'll have instant access to RAILChannel tutorial videos.
- If you need help, visit the support page. Simply touch a phone number or email to reach our support personnel quickly.
- Compatible with iOS and Android.

### **About Bourque Logistics**

Headquartered in The Woodlands, Texas, Bourque Logistics has automated rail shipment processes for shippers since 1989 with RAILTRAC®, the leading rail fleet and shipment management software for rail shippers.

BL now provides a full suite of modules to address multi-mode shipment operations for loading and shipping, bill of lading submission, tracking and tracing, freight rating and payment, fleet accounting, supply chain management and custom reporting. Our EDI data services connect shippers with their suppliers, customers, and carriers. BL also provides professional service support for rail fleet expediting and railcar maintenance management.
